- 23 Farbwechsel dynamisch/Changement de couleur (dynamique)/Kleurverandering dynamisch
- 24 lila (gleichbleibend)/violet (constant)/purper (constant)

Pflegeanleitung

ACHTUNG: Absolut schädigend für die Acrylfront sind alle Lösungsmittel (Kohlenwasserstoffe, z.b. Verdünnung) selbst in der geringsten Konzentration.

Acryl-Pflege: Für den Erhalt der glänzenden Schönheit dieses Materials ist nur ein geringer Aufwand erforderlich. Normalerweise genügt leichtes Abwischen mit einem weichen, eventuell auch feuchten Tuch. Starkes Reiben ist wegen der elektrostatischen Aufladung zu vermeiden. Größere Verschmutzungen lassen sich gut mit lauwarmen Seifenwasser entfernen.

Maintenance and Treatment

ATTENTION: Please do not use any corrosive chemical cleaners on the front. Even diluted cleaners can damage the finish of the acrylic.

Maintenance of acrylic: to keep the shining surface of this material less effort is needed. In general you need only to clean it with a soft, maybe moist duster. Heavy rubbing may cause electrostatic effects. Larger marks can be easily cleaned with lukewarm soapy water.

Gebruik en Onderhoud

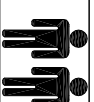

LET OP: Gebruik a.u.b. geen chemische reinigingsmiddelen (ook niet verdund), hiermee beschadigt U het acryl front.

Onderhoud van het acryl: Om het oppervlak mooi glanzend te houden, is het aan te raden om het oppervlak regelmatig met een schone en zachte doek (stofdoek) af te nemen. Harde wrijving kan statisch maken, waardoor het materiaal stof aan zal trekken. Hardnekkige vlekken kunnen met een lauw warm sopje gereinigd worden.

Maintenance et Entretien

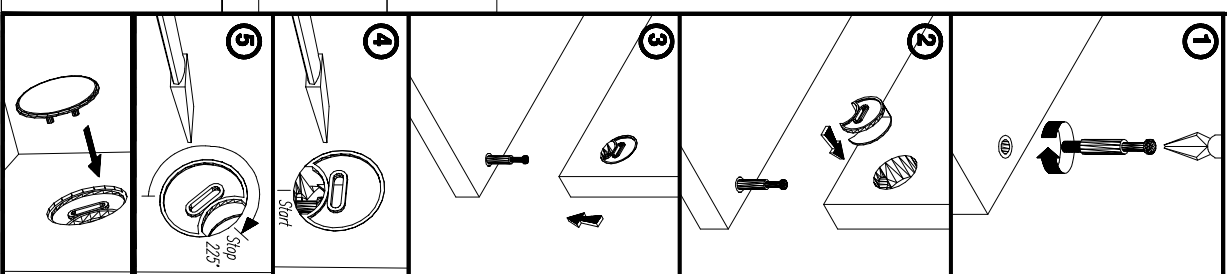

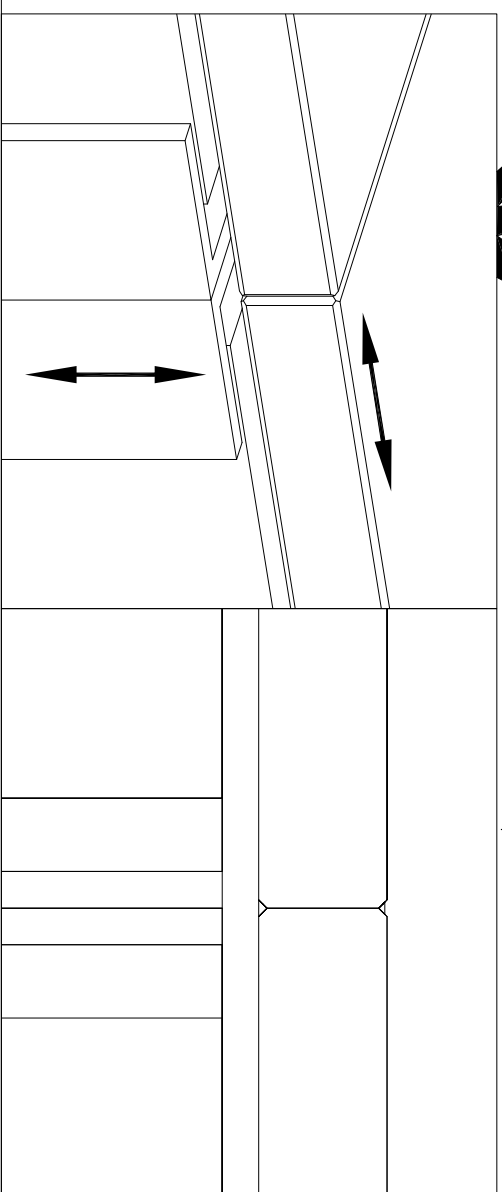

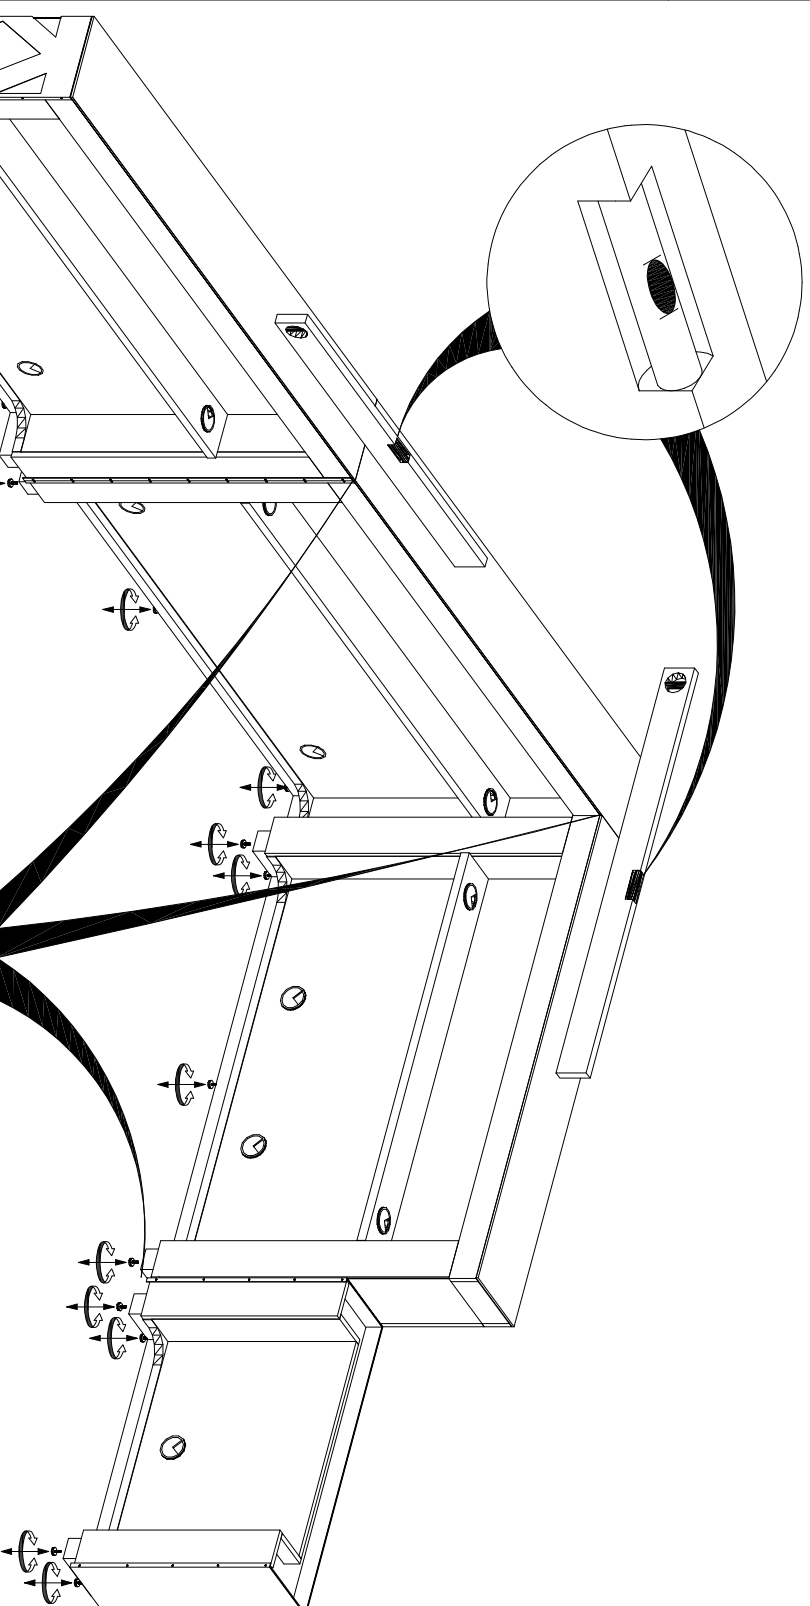

ATTENTION: Evitez les produits de ménage chimiques, même dilués ils peuvent abîmer l'acrylique front.

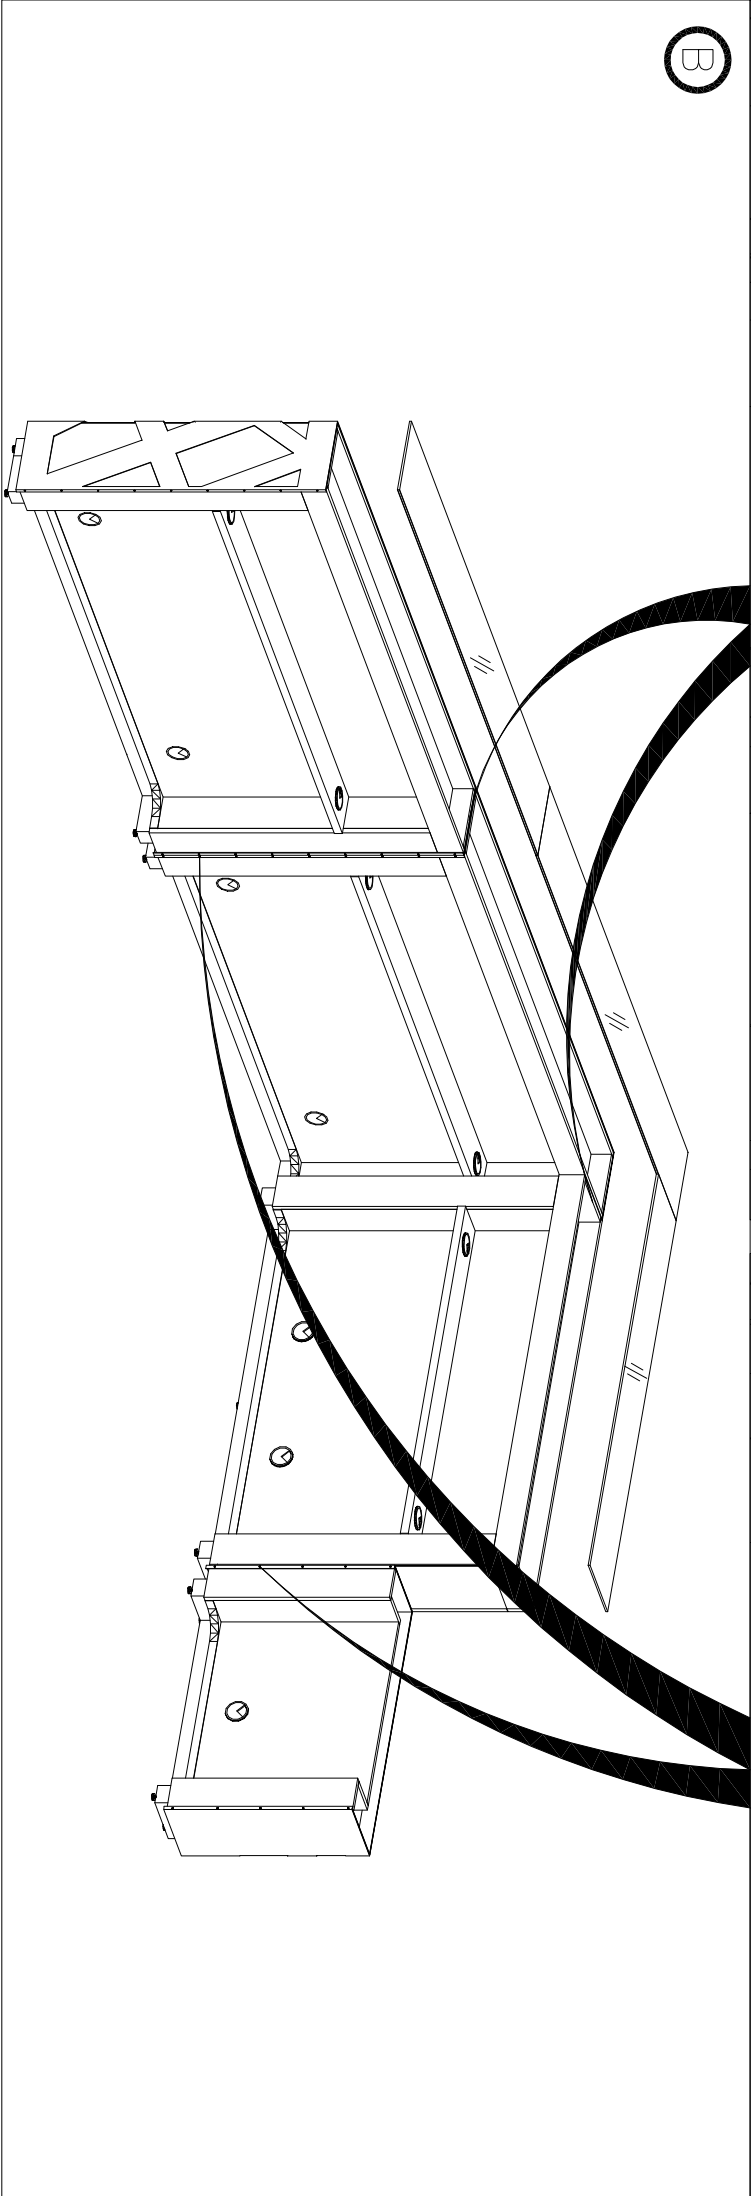

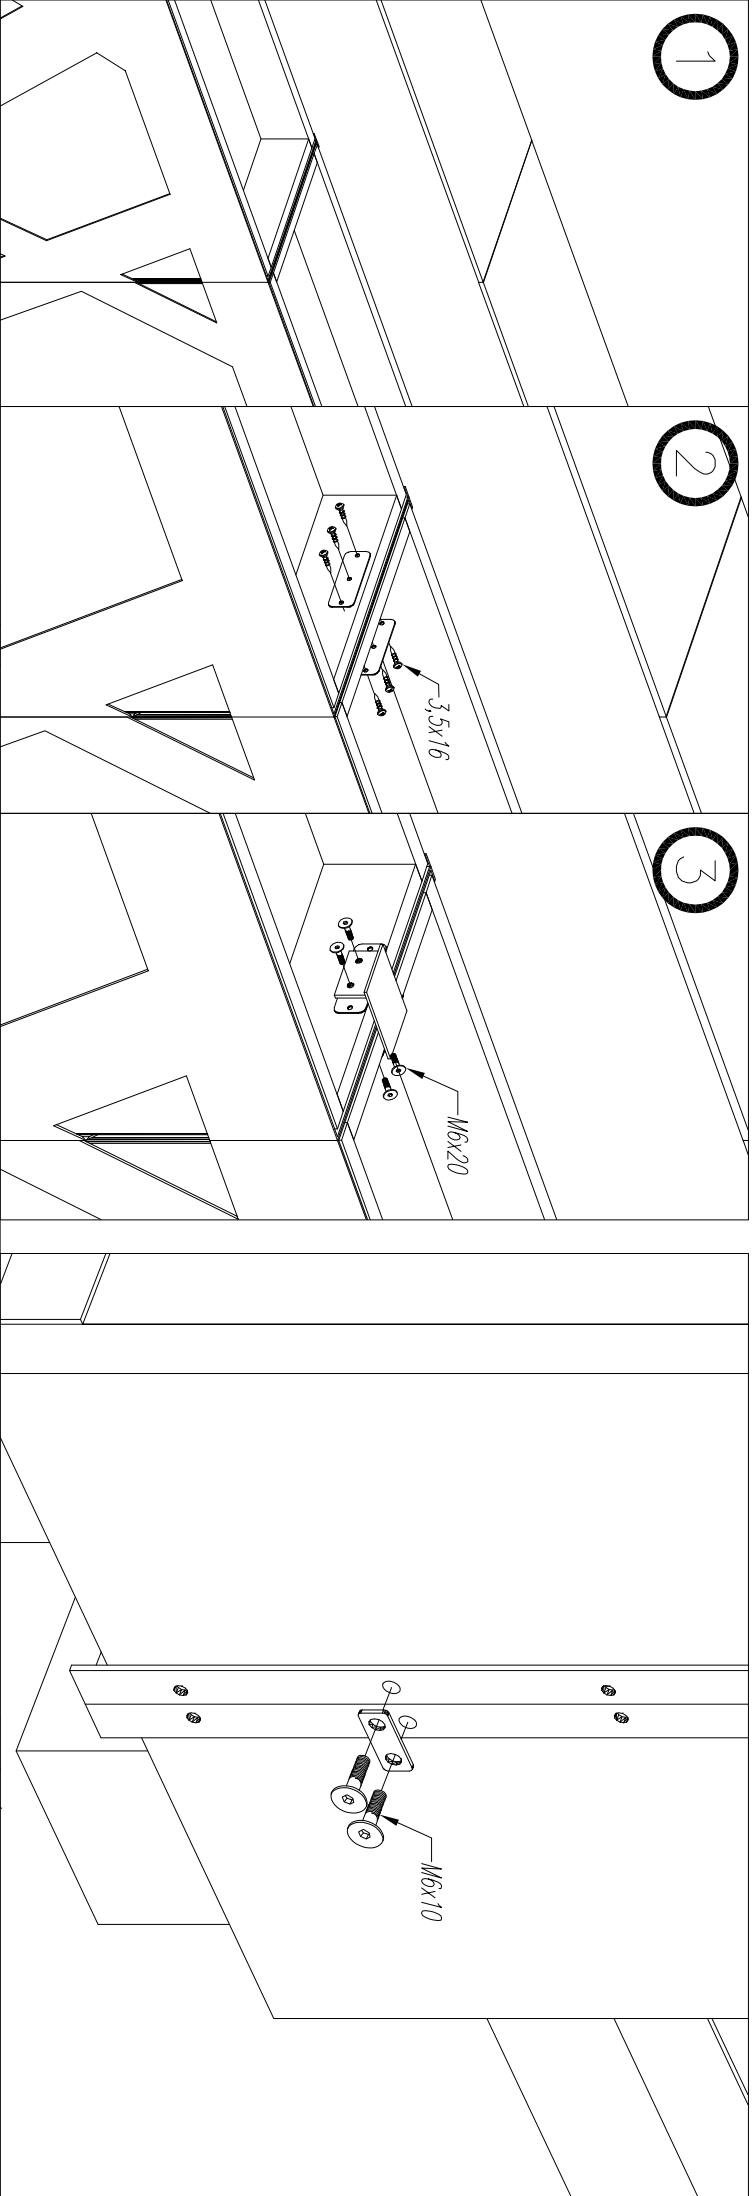

Afin de pouvoir profiter le plus longtemps possible, merci de suivre les instructions suivantes: Afin de maintenir la surface acrylique brillante, il vous suffit de la nettoyer à l'aide d'un chiffon doux. Ne frottez pas trop violemment afin d'éviter des effets électrostatiques. Des traces tenaces peuvent être nettoyées avec de l'eau et du savon.
